

POLICY STATEMENT AND PLAN FOR EARMARKED RESERVES 2020-21 (as adopted at Full Council on 5. 12.2019)

Earmarked Reserves are amounts set aside for specific policy or project purposes or for general contingencies and cash flow management. For each reserve established, the purpose, usage and basis of transactions needs to be clearly defined.

The Reserves identified will assist in the following ways:

- Create a working balance that will help to cushion the impact of any unforeseen issues to avoid cash flow problems and avoid any unnecessary borrowing. This forms part of general reserves
- Create a contingency to cushion the impact of any unexpected events or emergencies. This also forms part of general reserves.
- Creates a means of building up funds to be used in the future against specific planned events, liabilities or projects.
- Insurance reserves – to meet the estimate of any future claims the enable the Council to meet the excesses not covered by Insurance
- Carry forward of underspend- Some expenditure budgeted for projects in a given year cannot be spent in that financial year. Reserves can be used as a mechanism to carry forward such resources.

GOVERNANCE

Sections 32 and 43 of the Local Government Finance Act require billing and precepting authorities in England and Wales to have regard to the level of reserves needed for meeting estimated future expenditure when calculating the budget requirement.

It is important therefore that all Councillors take responsibility for ensuring the adequacy of reserves and provisions when they set the budget.

Day to day monitoring and management of the Reserve shall sit with the Responsible Financial Officer, who must report Reserve activity and variance to Full Council.

The determination of the Community Council's Reserves will be consistent with meeting the Council's overall strategic objective, namely:

- Improving the quality of the Community's amenities
- Improving the environment and surroundings for the residents of the villages.

All identified Reserves must be approved by Full Council. Council will approve:

- The reason for creating the Reserve
- The usage of the Reserve- how and when it can be used
- The basis of transactions- The approval for expenditure from the Reserve shall sit with Full Council.

The Council (assisted by the Responsible Financial Officer) should annually appraise the risks facing the Council, and the adequacy of any reserves considered in the light of any identified risks.

Adopted 5.12.20

REPORTING ON RESERVES.

The overall level of balances shall be reported to Finance Committee.

Any issues arising shall be reported to the next Full Council Meeting.

A report on the Reserves shall be made annually to Full Council as part of the budget setting. This shall include statement of movements of Reserves for the year ahead and the following two years.

Once a Reserve has fulfilled the purpose for which it was established, and balance remaining shall be reallocated or brought into the overall balance.

Earmarked Reserves and their designated purpose shall be reviewed annually by Full Council.

EAR- MARKED RESERVES.

It is generally recommended that General (un-earmarked) reserves should lie between 3 and 12 months of gross expenditure.

Based upon the balance of accounts of 2018-19 ,Gresford Community Council currently hold Ear- Marked and Un-Earmarked Reserves of **£155,523** apportioned as follows:

£11,000 will be used to offset the precept for 2020-21, in order to keep the level of increase to a minimal percentage increase, mindful of the larger increase in Council Tax likely to be set by the Unitary Authority in the current climate.

An amount £26,123 is held as a Contingency Reserve to assist cash flow in the event of unforeseen occurrences. The recommended amount to be held in Reserves for contingency purposes is proportionately 3-9 months of gross expenditure. It is understood that this equates to 5 months' worth of total expenditure. This amount will also be used for any Asset transfer that might occur with the Unitary Authority.

An amount of £20,000 is held as Reserve to address replacement street lighting columns. Following a structural survey, we are advised that fifteen columns need replacement within the next three years. In addition, we are advised that a rolling programme of replacing all concrete columns with steel columns should be planned for. The average cost of replacing a column is £2000. Energy costs have already been reduced by the replacement of Sox and SORN lighting with LED .

An amount of £25,000 is allocated in Reserve to deal with Cemetery development and expansion costs. This will involve consultant's fees, grounds clearance , treatment, and landscaping and other facilities for users of the Cemetery. We are advised that planning and implementing necessary works for such expansion can take up to ten years.

An amount of £41,000 is placed within Reserves to deal with replacements to Play Area equipment and any future landscaping or improvement issues that may occur. Repairs that occur through the year are budgeted for within the annual budget. We know that the equipment and surfacing on the two play areas will need to be replaced within the next 15-20 years. The MUGA will also need resurfacing and upgrading. The average cost of one item of play equipment , landscaping and installation costs is £16,000. Grant match funding will be explored.

An amount of £4000 is placed in reserves to deal with any General Environmental improvements.

The Council is currently exploring the purchase of a parcel of land, currently used as Allotments, in order to enable the Allotments to be able to continue, and to protect the land. This is likely to cost at least £28,000.

Adopted 5.12.20

RESERVES POLICY PLAN 2020-21				
	Amount £'s	Planned date of expenditure	Amount Per year /event anticipated spend	% of Total Reserves
Offset to Precept 2020-21	10,400	31 st March 2021	£10,400	7%
